OVER FIFTY YEARS OF INNOVATION

and we're only getting started

With over 50 years of successful delivery, coupled with our proven track record of innovation and local and international success, Tellumat has an established reputation as a long-standing leader in electronic and related technologies. Our end-to-end philosophy and integrated business units make us the ideal partner in our chosen fields, with long lasting partnerships with customers and global technology partners testament to this.

Our people, processes and solutions are backed by innovative research and fronted by specialised skills. We solve problems - from design to operations and beyond, and believe technological innovation and imagination are the cornerstones of a safer, connected, more environmentally responsible and sustainable future. At Tellumat, we see challenges as opportunities for innovative solutions.

As a majority black-owned group, Tellumat offers exciting opportunities.

Jointly owned by Amalinde Technologies (51.1%) and JSE-listed Stellar Capital (48.9%), Tellumat is ideally positioned not only as an empowering supplier for South African commercial, government and parastatal contractors, but similarly as partners for global entities looking to enter Southern African markets. Our record of innovation and successful technology delivery provides the platform from which to drive new initiatives and possibility, adding long-term value to partners and customers.

Empowerment & social responsibility

Empowering individuals and communities

Limited access to opportunity remains one of the greatest scourges in South Africa. Lack of education, poor resources and inadequate infrastructure still characterise many communities across our country. At Tellumat, we believe that individuals provided with the opportunity to study and develop skills, will not only be able to take advantage of opportunities, but will also forge their own and inspire others.

Tellumat is a black-owned Level 2 B-BBEE Contributor.

Our Areas of Expertise

Air Traffic Management (ATM)

Driven by safety, quality and innovation

Tellumat ATM has a strong track record in the industry with over 40 years' experience within South Africa's Defence Force and many of Sub-Saharan Africa's commercial airports.

Our selection of trusted, high quality original equipment manufacturers (OEMs) and partners, is a critical part of our end-to-end approach and drive to create lasting value for our customers. We install, commission, upgrade and support, and importantly, maintain a diverse portfolio of compliant air traffic management equipment and systems across both civil and military airports and aerodromes.

Defence & Security

Committed to the defence of your future

Defence and Security requires long-term commitment and expertise, combined with technical and design innovation - all of which depend on trusted relationships and partners. We develop, manufacture and support a varied portfolio of products, systems and solutions for through-life operation in demanding military and commercial environments.

Product families include identification friend or foe (IFF) for land, sea and air platforms, innovative air-ground data links, and unmanned aerial systems (UAS) for government and commercial use.
